

We at Yadav Design Group are proud to be a part of our local community. On April 27, 2013, we lead a community service project to celebrate Earth Day. The event was organized to plant native, drought resistant plants at the Nature Trail at Mission San Jose Elementary School, Fremont.

The project was a great success and we were overwhelmed with the response from the community. We got double the number of volunteers expected. Volunteers collectively donated over 300 hours of service to install over 100 plants to transform a barren piece of land into a beautifully landscaped nature trail that will be used by the elementary school students. Additionally, overgrown trees at the trail were pruned and the crushed gravel was raked.

We all lead busy lives with constant demands on our time. It is heartwarming to see the community come together and make such a positive contribution towards the environment. Thank you for carving out time to join Yadav Design Group in service at this Earth Day celebration!!!
